

VELICHALAMALA HARSHITH REDDY

hv8030@srmist.edu.in | 6304696856 | 2027

B.Tech, Computer Science and Engineering

Address : SRM Hostal,Parri block,Room.no 721

Summary

Full-Stack Developer with a strong passion for emerging technologies and modern development practices. Experienced in building scalable web applications across the full development stack. Actively leverage AI-powered tools and automation to enhance development efficiency, improve code quality, and deliver innovative, high-performance solutions.

Education

SRM IST-Kattankulathur

B.Tech · Computer Science and Engineering

2027

CGPA - 9.02/10

Narayana collage

Class XII - state board · MPC · kanuru,100ft road,vijayawada

2023

Percentage - 88.4%

Viswabharathi wisewoods

Class X - CBSE · mpc · gudiwada

2020

Percentage - 72%

Experience

Team Envision | [Link](#)

Frontend Developer · developer · none

Dec 2024 - Present

SRM University

I work as a Frontend Developer in Team Envision at SRM University, where I design and develop intuitive, responsive user interfaces. My role involves translating ideas and requirements into clean, functional web experiences using modern frontend technologies. I collaborate closely with the team to ensure usability, performance, and visual consistency across all projects.

Projects

E-Commerce Website | [E-Commerce](#)

own · html,css,javascript

Jan 2025 - Jan 2025

Web development

An E-commerce static website is a simple online storefront built using HTML, CSS, and JavaScript, where content remains fixed unless manually updated. It showcases products or services, typically including pages like Home, Products, About Us, and Contact. Unlike dynamic websites, static sites don't have real-time inventory updates or shopping carts but are ideal for small businesses or portfolios looking to present products professionally without the need for complex backend systems. They're fast, secure, cost-effective, and easy to host, making them great for lightweight online presence.

Call for Aaruush | [Call for Aaruush](#)

Team Envision · nextjs,nodejs ,typescript and tailwind css

Jun 2025 - Jul 2025

Web development

Aaruush, SRM's national-level techno-management fest, is calling for passionate students to join its organizing team. Whether you're into design, content, tech, marketing, or event management, this is your chance to be part of one of India's biggest student-run fests. Gain hands-on experience, work with industry leaders, and grow your skills while creating something unforgettable. Be a part of the legacy!

T-summit | [T-Summit25](#)

Team envision · next js,nodejs, typescript and tailwind css

Jul 2025 - Present

Web development

T-Summit is SRM's premier technology and innovation summit, aimed at bringing together brilliant minds to collaborate, learn, and showcase cutting-edge ideas. The call for T-Summit invites enthusiastic students to join the core team across domains like content, design, tech, logistics, and outreach. It's a platform to gain real-world experience, network with experts, and contribute to a high-impact event that celebrates innovation, leadership, and teamwork.

The inventory system in Aaruush plays a vital role in managing and tracking all the resources, materials, and equipment required for the fest. It maintains records of items procured, distributed, and returned, ensuring proper accountability and smooth functioning. Different domains and event teams can request resources through this system, which helps in efficient allocation and avoids duplication or shortage. Proper documentation within the system prevents misuse and ensures transparency in resource handling. By monitoring stock levels in real-time, it supports timely logistics and replenishment when necessary. Overall, the inventory system streamlines resource management, reduces wastage, and contributes significantly to the successful execution of Aaruush.

Developed Pingsta, a fully AI-driven agent designed to assist people in need with intelligent automation. The system integrates three core modules: Document, Layer, and Emergency. The Document module securely manages critical personal records such as Aadhaar, Voter ID, and other essential documents, powered by a GPT-4 trained LLM for intelligent retrieval and interaction. Similarly, the Layer module leverages the trained model for advanced contextual support and decision-making. The Emergency module is categorized into Minor and Major services: in Minor cases, the AI initiates direct calls to registered contacts, while in Major cases, it automatically contacts emergency services such as police, fire, and ambulance, and shares essential details via WhatsApp. This system demonstrates expertise in AI integration, LLM-based automation, and real-time emergency response solutions.

Certifications

AWS Solution Architecture is the design of scalable and secure systems using AWS services like EC2, S3, RDS, and Lambda. It focuses on performance, cost-efficiency, and reliability by following best practices from the AWS Well-Architected Framework. This approach helps developers and businesses build cloud applications that are efficient, fault-tolerant, and easy to manage.

Successfully completed the Networking Basics course offered by Cisco Networking Academy. Gained foundational knowledge in networking concepts including network types, protocols, IP addressing, and basic network troubleshooting.

Publications

Presented a project on kidney stone detection using the YOLOv8 deep learning model during the academic year 2024–2025. The work focused on applying computer vision techniques to medical imaging for accurate and efficient detection of kidney stones, demonstrating practical use of AI in healthcare diagnostics.

Volunteering

Served as a Galactic Local Mentor at the NASA International Space Apps Challenge 2025, guiding participants in solving real-world challenges related to Earth and space. Provided technical mentorship, problem-solving support, and strategic direction to teams during the global hackathon, fostering innovation and collaborative development.

Active student member of The Institution of Engineers (India) Students' Chapter at SRM Institute of Science and Technology. Engaged in technical activities, professional development programs, and engineering-oriented initiatives that promote leadership, innovation, and industry awareness among students.

Competitions

Smart India Hackathon (Internal Edition) 2025 | [Certificate](#)

Sep 2025

Participant · Directorate of Entrepreneurship & Innovation, SRM Institute of Science and Technology

Participated in the Smart India Hackathon (Internal Edition) 2025 organized by the Directorate of Entrepreneurship & Innovation at SRM Institute of Science and Technology. Worked collaboratively in a team to develop innovative solutions within a competitive, time-bound hackathon environment, strengthening problem-solving, coding, and teamwork skills.

Club Wars 2026 | [Certificate](#)

Jan 2026

Participant · Directorate of Entrepreneurship & Innovation, SRM Institute of Science and Technology

Participated in Club Wars 2026, a competitive inter-club event organized under the Directorate of Entrepreneurship & Innovation at SRM Institute of Science and Technology. Engaged in collaborative and competitive activities that emphasized teamwork, leadership, and strategic problem-solving in a multi-club environment.

Skills

Languages and Frameworks: Html,css,javascripte,Bootstrap,Tailwind CSS,React.js,Next.js

Technical Skills: Responsive Design (Media Queries, Flexbox, Grid),Version Control (Git & GitHub)

Programming Languages: C language,Python

Languages

Telugu [Native Proficiency], English [Professional Working Proficiency], Hindi [Elementary Proficiency]
